BIOMETRIKA

A JOURNAL FOR THE STATISTICAL STUDY OF BIOLOGICAL PROBLEMS

FOUNDED BY

W. F. R. WELDON, FRANCIS GALTON AND KARL PEARSON

EDITED BY

KARL PEARSON

VOLUME VIII

JULY 1911 TO JANUARY 1912

CAMBRIDGE
AT THE UNIVERSITY PRESS

LONDON: FETTER LANE, E.C.
(C. F. CLAY, MANAGER)
AND H. K. LEWIS, GOWER STREET
EDINBURGH: 100, PRINCES STREET
NEW YORK: G. P. PUTNAM'S SONS
BERLIN: A. ASHER AND CO.
LEIPSIC: BROCKHAUS
BOMBAY AND CALCUTTA: MACMILLAN AND CO., LIMITED

CONTENTS OF VOL. VIII.

Memoirs.

		PAGE
I.	A Third Cooperative Study of *Vespa Vulgaris*. Comparison of Queens of a Single Nest with Queens of the General Autumn Population. By E. Y. Thomson, Julia Bell, and Karl Pearson . . .	1
II.	Pigmentation of the Hair and Eyes of Children suffering from the Acute Fevers, its Effect on Susceptibility, Recuperative Power and Race Selection. By David Macdonald	13
III.	First Results from the Oxford Anthropometric Laboratory. By E. Schuster	40
IV.	On the Correlation between Somatic Characters and Fertility: Illustrations from the Involucral Whorl of *Hibiscus*. By J. Arthur Harris	52
V.	Anthropometry of Modern Egyptians. By J. I. Craig . .	66
VI.	The Teacher's Estimation of the General Intelligence of School Children. By H. Waite	79
VII.	On the Significance of the Teacher's Appreciation of General Intelligence. By W. H. Gilby	94
VIII.	The Danger of Certain Formulae suggested as Substitutes for the Correlation Coefficient. By David Heron	109
IX.	Cranial Type-Contours. By the late R. Crewdson Benington. Prepared for press by Karl Pearson	123
X.	The Opsonic Index. "Mathematical Error and Functional Error." By Karl Pearson	203
XI.	Observations on the Occipital Bone in a series of Egyptian Skulls, with Especial Reference to the Persistence of the Synchondrosis Condylo-Squamosa (Zaaijer) (Synchondrosis Intraoccipitalis Posterior, BNA). By H. Dorothy Smith	257
XII.	A Study of Pygmy Crania, Based on Skulls found in Egypt. By H. Dorothy Smith	262

70058

PAGE

XIII. Notes on the Pigmentation of the Human Iris. By A. Rudolf Galloway 267

XIV. The Increase in the Number of Erythrocytes with Altitude. By Hugh W. Acton and W. F. Harvey 280

XV. A Study of the Negro Skull with Special Reference to the Congo and Gaboon Crania. By the late R. Crewdson Benington. Prepared for press by Karl Pearson 292

XVI. On the Relation of Stature and Weight to Pigmentation. By Ethel M. Elderton 340

XVII. Pigmentation in Relation to Selection and to Anthropometric Characters. By A. M. Carr Saunders 354

XVIII. Supplementary Tables for finding the Correlation Coefficient from Tetrachoric Groupings. By P. F. Everitt 385

XIX. Note on the Extent to which the Distribution of Cases of Disease in Houses is determined by the Laws of Chance. By J. McD. Troup and G. D. Maynard 396

XX. On the Appearance of Multiple Cases of Disease in the same House. By Karl Pearson 404

XXI. Growth, Variability and Correlation in Young Trout. By J. W. Jenkinson 444

Miscellanea.

(i) Note on the Age Distribution of Deaths from Diabetes Mellitus. By G. D. Maynard 225

(ii) On Pulse and Breathing Rates and their Relation to Stature. By Julia Bell 232

(iii) The Tooth-Brush and Decayed Teeth. By Frank Rock . . 237

(iv) Note on High Values of β_1, β_2. By Georg Duncker . . . 238

(v) Further Remarks on the Law of Ancestral Heredity. By Karl Pearson 239

(vi) The Inheritance of Fertility. By R. E. Lloyd 244

(vii) Remarks on Professor Lloyd's Note on Inheritance of Fertility. By Karl Pearson 247

(viii) On the Probability that two Independent Distributions of Frequency are really Samples from the same Population. By Karl Pearson 250

PAGE

(ix) On a Correction to be made to the Correlation Ratio η. By KARL PEARSON 254

(x) A Simplified Method of calculating Frequencies of Occurrence, from a Large Number of Unequal Probabilities. By A. G. McKENDRICK 413

(xi) The Application of the Correlation Coefficient to Mendelian Distributions. By E. C. SNOW 420

(xii) A Mendelian View of Racial Heredity. By H. J. LASKI . . 424

(xiii) On "Cancer Houses," from the Data of the late Th. Law Webb, M.D. By KARL PEARSON 430

(xiv) Hybridisation of Canaries. By A. RUDOLF GALLOWAY . . . 435

(xv) An Attempt to ascertain the Prevalence of Syphilis in a large Urban Population. By W. P. E. 437

(xvi) On the General Theory of the Influence of Selection on Correlation and Variation. By KARL PEARSON 437

(xvii) On a Fallacious Proof of Sheppard's Correction by K. P. . . 443

Biometric Memoirs and Statistical Reviewers. A Letter from E. C. SNOW 456

Plates.

PARTS I. AND II.

Plate I. Sagittal Contour. Cranium of the Murderer Thurtell . . 139

Plate II. Sagittal Contour. Egyptian Cranium 141

Plates III—V. English Crania. Type-Contours . . . . 143—147

Plates VI—VIII. Cro-Magnon Crania. Type-Contours . . . 149—153

Plates IX—XI. Congo Crania. Type-Contours. Fernand Vaz, 1864 . 155—159

Plates XII—XIV. Congo Crania. Type-Contours. Fernand Vaz, 1880 . . . . . 161—165

Plates XV—XVII. Congo Crania. Type-Contours. Batetelu Race . 167—171

Plates XVIII—XX. Egyptian Crania. Type-Contours . . . 173—177

Plates XXI—XXIII. Eskimo Crania. Type-Contours . . . 179—183

Plates XXIV—XXVI. Guanche Crania. Type-Contours . . . 185—189

Plates XXVII—XXIX. English Crania, 17th Century. Type-Contours 191—195

Plates XXX—XXXII. Living English Head. Type-Contours . 197—201

(Also Thirty-two copies of Cranial Type-Contours in pocket at the end of volume.)

PARTS III AND IV.

Plate I.	Complete Synchondrosis	*to face p.*	257
Plate II.	Fig. A. Unilateral Incomplete Synchondrosis . .	„	„
	Fig. B. Bilateral Incomplete Synchondrosis . .	„	„
Plate III.	Fig. A. Bilateral Slight Synchondrosis . . .	„	„
	Fig. B. Bilateral Incomplete Synchondrosis . .	„	„
Plate IV.	Fig. A. Bilateral and Complete Synchondrosis from Masto-Occipital Suture to Foramen Magnum .	„	„
	Fig. B. Synchondrosis on left side with Ossicle at Masto-Occipital end	„	„
Plate V.	Fig. A. Slight trace of Synchondrosis on right side with Opisthial Notch	„	„
	Fig. B. Trace of Synchondrosis on both sides; well marked traces of *basiotique* of Albrecht, etc. . .	„	„
Plate VI.	Development of the Human Occipital—Fig. a. Foetus of about five months. Fig. b. Infant at birth. Fig. c. Child of one year. Fig. d. Child of about three years. Fig. e. Child of about five years .	„	„
Plate VII.	Pygmy Cranium, E 487. Norma lateralis . .	„	264
Plate VIII.	Pygmy Cranium, E 487. Norma facialis . . .	„	„
Plate IX.	Pygmy Cranium, E 487. Norma basalis . . .	„	„
Plate X.	Pygmy Cranium, E 487. Norma verticalis . .	„	„
Plate XI.	Pygmy Cranium, E 487. Norma occipitalis . .	„	„
Plate XII.	Pygmy Cranium, E 506. Norma lateralis . .	„	„
Plate XIII.	Pygmy Cranium, E 506. Norma facialis . .	„	„
Plate XIV.	Pygmy Cranium, E 506. Norma basalis . . .	„	„
Plate XV.	Pygmy Cranium, E 506. Norma verticalis . .	„	„
Plate XVI.	Pygmy Cranium, E 506. Norma occipitalis . .	„	„
Plate XVII.	Pygmy Crania, E 487 and 506, compared with normal crania	„	„
Plate XVIII.	Pygmy Cranium, L 2/63, Norma lateralis . . .	„	„
Plate XIX.	Pygmy Cranium, L 2/63. Norma facialis . . .	„	„

Plate XX. Pygmy Cranium, L 98/90 B. Norma lateralis *to face p.* 264

Plate XXI. Pygmy Cranium, L 98/90 B. Norma facialis . „ „

Plates XXII—XXIV. Pelvis of Pygmy, L 98/90 B and Normal pelvis compared in different aspects . . . „ „

Plate XXV. Coloured Plate, Sections of Iris of G. C., to illustrate distribution of pigment . . . . . „ 272

Plate XXVI. Fernand Vaz Crania, Gnawed or Filed Crania, Cleft Palate . . . . . „ 321

Folding Tables of Cranial Measurements I, II, III A, III B, and IV . . . . . „ 336
